Is Wet Cleaning, the new Dry Cleaning?

Northern Cleaners has been in the Dry Cleaning industry since 1960. Our combined dry cleaning experience amounts to over 70 years.

Over the years we have tried and tested a number of Wet Cleaning systems and none of them has succeeded our expectations nor carried our satisfaction ..... until now!

Northern Cleaners was tasked to trial SmartClean's new Wet Cleaning system. Based on our past experiences we were a little circumspect about the possibility of success.

We have now been using the system for the past 6 months and to our amazement, it has surpassed our expectations in every aspect.

We've cleaned 100% Wool, Silk blouses, Ties, Leather and Suede garments to name a few, with ease; and to perfection.

Garments emerge smelling fresh, soft to the touch and extremely easy to finish. Smart Clean's system is environmentally friendly, more effective than PERC and less harmful to the environment, our staff and our customers.

It is definitely a product for the conscientious cleaner looking to not only contribute to a healthier environment but also to healthier profit margins.

We endorse it wholeheartedly.
